Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2, 3, 5 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yamamoto JP 09-262881.

3. The examiner notes that a "cylinder" is defined as "a surface or solid bounded by two parallel planes and generated by a straight line moving parallel to the given planes and tracing a curve bounded by the planes and lying in a plane perpendicular or oblique to the given planes" Or "any cylinderlike object or part, whether solid or hollow".

Therefore, the mold cavity 5 and core 23 are shaped for forming a cylinder.
